5-Day Precipitation Forecast & River Flood Status

SR ROC
REGIONAL OPERATIONS CENTER

Note: Even though the image displays 5 days of forecasted rainfall, river forecasts only include 1-2 days of rainfall

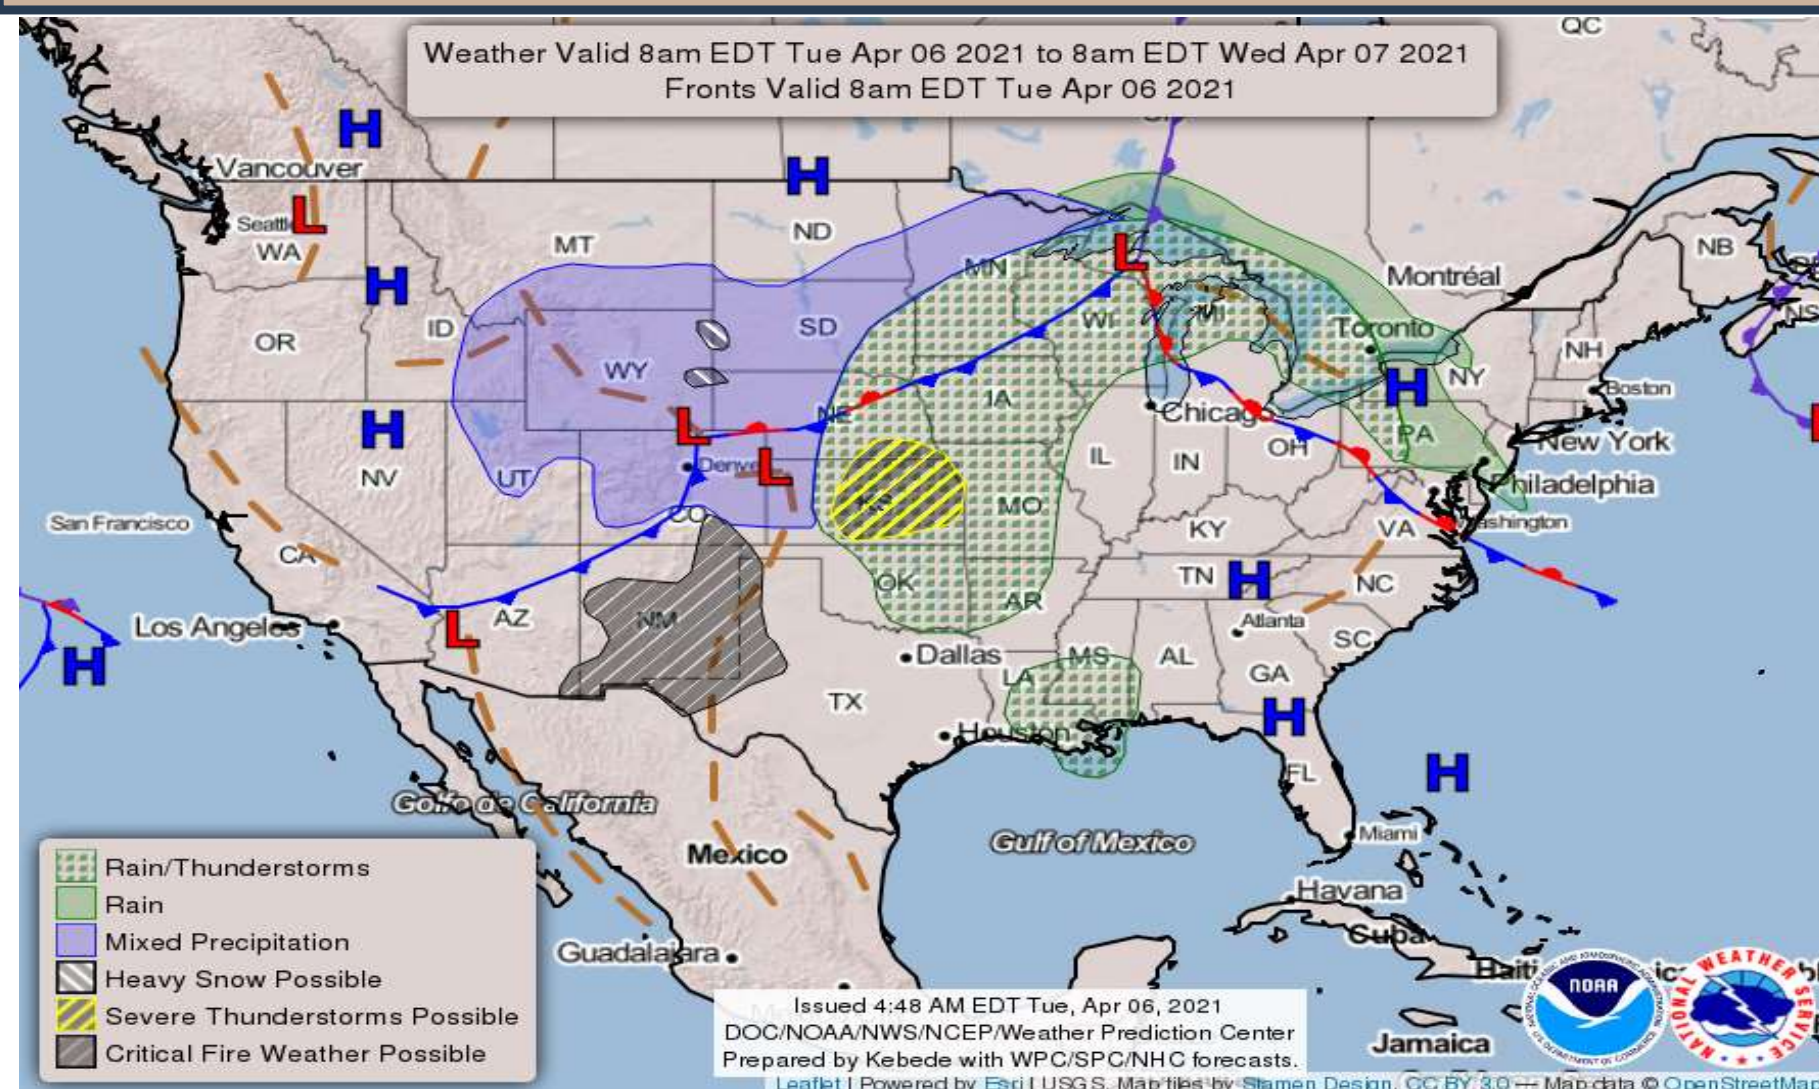

Minor river flooding continues across portions of LA and AR with impacts to secondary roads and agricultural/recreational areas.

The Mississippi River at Natchez in SW MS will remain in moderate flood stage through late this week; no significant impacts in LA.

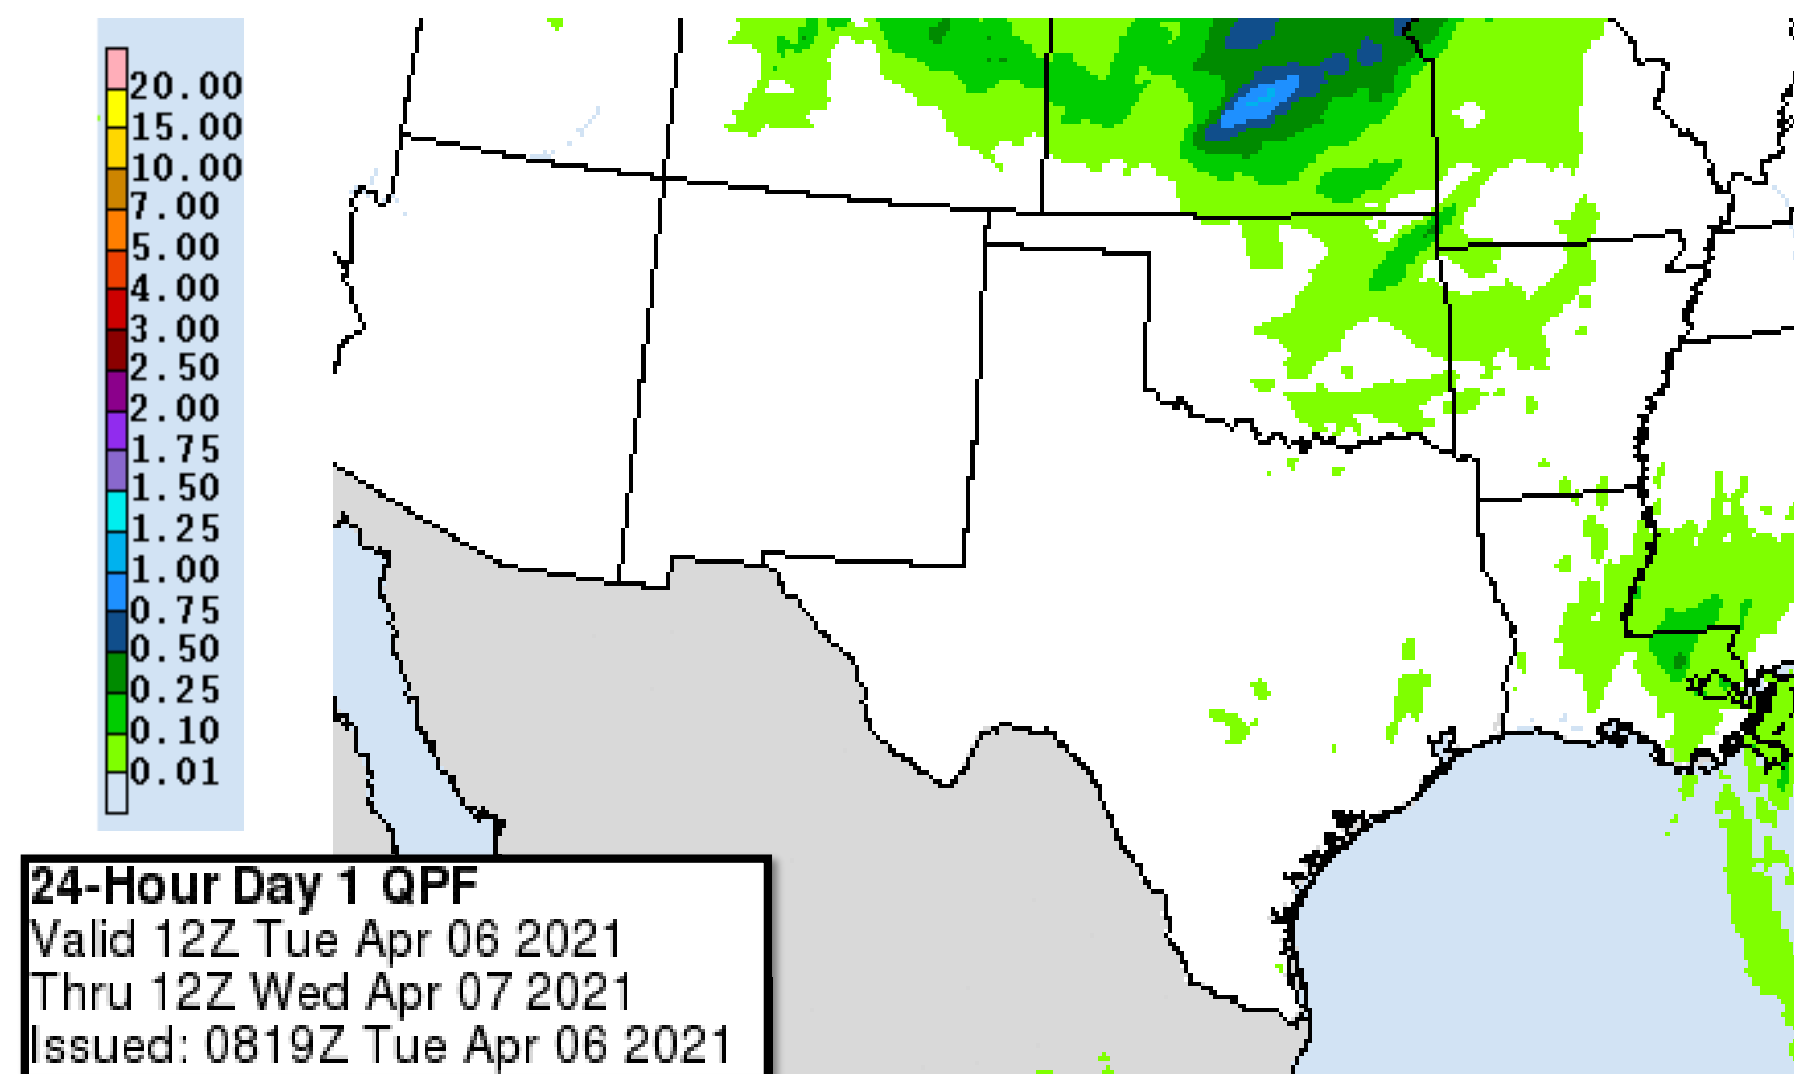

The Mississippi River at Red River Landing and Baton Rouge are in moderate flood stage. River islands will be inundated, recreational camps and river bottom land will be under water. Water approaches Angola farm land. Near Baton Rouge, river traffic and industrial activity on the river side of the levees will be greatly affected.
